Georgina Colaiacovo | Beat Mobile
General coordinator of the Mercado Libre, Warner Music and Paramount areas.

Contacts available upon request

SALVADOR DI SABATTO

FULL STACK JUNIOR DEVELOPER

Junior Web Developer with 3 years of self-taught study in Frontend and Backend, developing personal projects and for clients. I work with JavaScript/TypeScript across the entire stack, building complete web applications with a focus on best practices and scalability.

Experience

Internal Metadata Tool | Beat Mobile

Application designed to streamline the creation of audiovisual metadata for the Mercado Play (Mercado Libre) streaming platform.

Internal tool that integrates the TMDb public API to automate the creation and ingestion of audiovisual content metadata for Mercado Play (Mercado Libre's streaming service), reducing manual tasks and adapting to the specific requirements of the client.

Generic and adaptable E-commerce (Full Stack)

Solid Backend and Frontend e-commerce, designed to be adaptable and scalable for future clients and multiple stores

Backend development of a generic e-commerce platform, including product and category management, soft delete, users and roles, order management, and a main frontend page editor. Project covered with more than 3,000 automated tests.

Backend Stack: TypeScript – Node.js – Express – PostgreSQL – Prisma ORM – Better Auth – Zod – Vitest – Supertest

Frontend development of the e-commerce application consuming the backend, with authentication pages, role-protected routes, an admin dashboard for product and user management, and a visual editor for the store's main page.

Frontend Stack: TypeScript – React – Next.js – Tailwind CSS – Axios – TanStack Query – React Hook Form – Zustand – Zod – shadcn/ui

Beat Mobile Entertainment Solutions

Manual QA/QC technician & internal tools developer | 2023 – Present

Technical work in manual QA/QC and development of internal frontend tools, integrating third-party APIs (TMDb) to automate previously manual processes, reducing operational time and errors.

Argentine economic indices calculator

Inflation calculator, purchasing power variation, and rent update calculations.

Frontend application that consumes official public-access government APIs, allowing the calculation of accumulated inflation, purchasing power variation, and updated rental values based on the most commonly used economic indices.
